

### **Manufacturing Technology Lab:**

The manufacturing of various products is done at different scales ranging from domestic production of say candlesticks to the manufacturing of machines including motor cycle, go kart and so forth. The word manufacturing technology is mainly used for the latter range of the spectrum of manufacturing, and refers to the commercial industrial production of goods for sale and consumption with the help of gadgets and advanced machine tools. Industrial production lines involve changing the shape, form and/or composition of the initial products known as raw materials into products fit for final use known as finished products.
