Mr. J . SHEIK MOHAMED COORDINATOR, SAA Dr. M. SARAVANAN DEAN - ACADEMICS Dr. N. VENKATACHALAPATHI PRINCIPAL A One Day Workshop on **"Introduction to Front End Development"** is organized by MCA Department in Association with SITAMS Alumni Association (SAA), Sreenivasa Institute of Technology and Management Studies, Chittoor. The Session is given by Mr. D. Nikhil, Free-Lancer.

This workshop provides the essential concepts, tools, and technologies used in creating user interfaces for web applications

The Topics Covered in this Workshop are

- 1) Introduction to Front-End Development.
- 2) Introduction to the core technologies.
- 3) HTML.
- 4) CSS.
- 5) JavaScript.
- 6) Tools and Best Practices.
- 7) Hands-on Exercises.

Mr. Nikhil has explained, what is Front End and what are the languages or technologies used in Front End Development. Overall, the workshop provided a comprehensive introduction to the core concepts and technologies involved in front-end web development. Both I MCA and II MCA Students have attended the Workshop.

Brief Summary of the Workshop "Introduction to Front End Development"

Name of the Event Type (Workshop/Guest Lecturer, Webinar)	Workshop
Organized By	MCA Department
Professional Society / Departmental Association	SAA & Departmental Association
Resource Person	Mr. D. Nikhil, Free Lancer
Title of the Event	Introduction to Front End Development
Date	15-05-2024
Time	10.00 AM to 4.00 PM
Venue	E-Classroom (409 A) – MCA BLOCK
No. of Participants	75(I MCA and II MCA)
Convenor and Coordinator SAA	Mr. J. Sheik Mohamed
Coordinator of the Event	Dr. R. Saraswathi
Objective of the Event	To introduce students to the essential concepts, tools, and technologies used in creating user interfaces for web applications
Topics Covered	 Introduction to Front-End Development. Introduction to the core technologies. HTML, CSS, JavaScript. Tools and Best Practices. Hands-on Exercises.

By the end of the workshop, students should be able to:
1. Gain a foundational understanding of the role of front-end development in web applications.
2. Acquire skills in using HTML for structuring web content and CSS for styling and creating responsive designs.
3. Understand the basics of JavaScript and how to use it to add interactivity to web pages.
4. Get introduced to essential front-end development tools and learn best practices for coding and design.
5. Apply the knowledge gained to create a simple, functional web page using HTML, CSS, and JavaScript.

A One Day Workshop on "**Cyber Security in BFSI**" is organized by MCA Department in Association with SITAMS Alumni Association (SAA), Sreenivasa Institute of Technology and Management Studies, Chittoor. The Session is given by Mr. Rukesh NK, Inside Sales Engineer, COMMVAULT SYSTEMS PVT Ltd., Bangalore.

This workshop provides the valuable insights and importance of Cyber Security in BFSI, and Common Cyber Threats to help participants gain knowledge about Cyber Security.

To provide students with an in-depth understanding of cybersecurity challenges and solutions specific to the Banking, Financial Services, and Insurance (BFSI) sector.

The Topics Covered in this Workshop are

- 1) Introduction to Cyber Security in BFSI.
- 2) Common Cyber Threats and Vulnerabilities.
- 3) Regulatory Requirements and Compliance.
- 4) Cybersecurity Best Practices and Solutions.
- 5) Incident Response and Recovery.

Mr. Rukesh explained about Cybersecurity in the Banking, Financial Services, and Insurance (BFSI) sector involves implementing measures to protect digital assets, data, and operations from cyber threats. It was an Excellent session for students who wants to learn Application Development. Both I MCA and II MCA Students have attended the Workshop.

SITAMS MCA Department organized a workshop with SAA, on the 6th of May 2024, on "**CYBER SECURITY IN BFSI**". The workshop featured a special speaker, Mr. Rukesh. N. K, Inside Sales Engineer, Commvault Systems Pvt. Ltd., Bangalore.

Objectives of the event:

- To provide MCA students with an in-depth understanding of cybersecurity challenges and solutions specific to the Banking, Financial Services, and Insurance (BFSI) sector.
- To educate students on the importance of cybersecurity in protecting sensitive financial data, the regulatory requirements, and best practices for securing systems and networks in the BFSI industry.

Overview of the event:

An offline workshop, organized for the MCA students to educate them and highlight the importance of Cyber Security in BFSI. The key topics covered in the workshop include:

- Overview of the BFSI sector and the critical role of cybersecurity in protecting financial assets and customer information. Discussion on the unique challenges faced by the BFSI sector, including regulatory compliance and the high value of data.
- Identification of common cyber threats faced by the BFSI sector, such as phishing attacks, ransomware, data breaches, and insider threats. Discussion on vulnerabilities in financial systems and how they can be exploited by cybercriminals.
- Overview of key regulatory frameworks and compliance requirements in the BFSI sector, including GDPR, PCI DSS, and RBI guidelines. The importance of adhering to these regulations to avoid legal penalties and protect customer trust.
- Best practices for securing networks, systems, and data in the BFSI sector, including encryption, multifactor authentication, and intrusion detection systems. Introduction to advanced cybersecurity solutions, such as artificial intelligence and machine learning for threat detection and response.
- Strategies for incident response and recovery in the event of a cybersecurity breach. The role of data backup and recovery solutions in ensuring business continuity.

Expected outcome(s) of the event:

By the end of the workshop, students are expected to:

- Understand Cybersecurity in BFSI: Gain a comprehensive understanding of the importance of cybersecurity in the BFSI sector and the specific challenges faced by this industry.
- Identify Cyber Threats and Vulnerabilities: Be able to identify common cyber threats and vulnerabilities affecting the BFSI sector and understand how they can be mitigated.
- Learn Regulatory Compliance: Understand the key regulatory requirements and compliance standards in the BFSI sector, and the importance of adhering to these regulations.
- Implement Cybersecurity Best Practices: Acquire knowledge of best practices for securing BFSI systems and data, and understand the role of advanced cybersecurity solutions.
- Prepare for Incident Response: Be prepared to develop and implement effective incident response and recovery plans in case of a cybersecurity breach.

The workshop was started at 10.00 AM. Mr. Rukesh. N. K has explained, what is Cyber Security and BFSI. Overall, the attendees gained a clear understanding of the unique challenges and regulatory requirements in this field and learned best practices for securing financial systems and data. The workshop also prepared students to handle cybersecurity incidents effectively, equipping them with the knowledge to develop robust security strategies and response plans.

A WORKSHOP

ON

DESIGN THINKING, CRITICAL THINKING AND INNOVATION DESIGN

ORGANIZED

BY

MCA Department in Association with ISTE

Event Coordinator & Convenor Dr. M. Kalpana Devi Professor & HOD MCA Department SITAMS

One Day Workshop

On

"DESIGN THINKING, CRITICAL THINKING AND INNOVATION DESIGN"

Objectives of the event:

- To provide an opportunity for students to understand the importance of designing innovative and desirable products, services or experiences that reflect all three aspects.
- To immerse students and faculty into the world of innovation as a systematic process of tackling relevant business and/or social problems.

Overview of the event: An offline workshop, organized for the II year MCA students & various streams of engineering to educate them and highlight the importance of Design thinking, critical thinking and Innovation Design. Innovation with design thinking demands critical thinking because we must understand our assumptions that frame our ideas and shape our design.

Design thinking is a method to increase a company's value and bring relief to users. It emphasizes user experience over the market, design over engineering and customer over product. In other words, it values the customer more than the business, eventually leading to business growth and expansion. Design thinking and innovation is not for the known problems or solutions but for non-existent and unique things that the world needs.

SITAMS MCA Department organized a workshop in association with ISTE, on the 27th of February 2024, on "DESIGN THINKING, CRITICAL THINKING AND INNOVATION DESIGN". The workshop featured a special speaker, Mr. Bhairavi Siva, Founder, Bhairavi Design & Skill Academy, Hosur, India.

The workshop was started at 10.30 AM. Mr. Bhairavi Siva has explained, what is Design thinking and Critical Thinking , what are the steps involved in this process. This workshop was a good learning experience for the participants. Overall, the workshop was an insightful and informative event that provided attendees with valuable knowledge and tools to drive innovation and business growth. By incorporating the insights shared by Mr. Bhairavi Siva, attendees can gain a better understanding of innovation design.

Expected outcome(s) of the event:

- > Helps students to understand the Design Thinking, Critical Thinking & Innovation Design.
- > To recognize the latest and future issues and challenges in innovation.
- Provide an insight into the real-world social problems to be addressed using the Design thinking Methodology.

TECH THINKERS ASSOCIATION - MCA DEPARTMENT

GUEST LECTURE ON

"Artificial Intelligence & Machine language Algorithms"

A Report on Guest Lecture titled "Artificial Intelligence & Machine language Algorithms" organized by MCA Department with an objective To provide students with a comprehensive understanding of AI and machine learning concepts and their practical applications, organized for MCA students in the departmental Laboratory on **4th September**, **2023**.

The resource person is Dr. G. Gopichand, Assoc. Professor, Department of CSE, Vellore Institute of Technology, Vellore

He has explained the fundamental concepts of artificial intelligence and machine learning. Explained various machine learning algorithms and their use cases, Demonstrated the implementation of AI and machine learning models, Provided insights into the latest advancements and trends in AI and machine learning, Encouraged critical thinking and problemsolving using AI and machine learning techniques. The event was a successful one. The guest lecture was relevant to the title and were well-appreciated by the students. After completion of this guest lecture students have felt encouraged to explore these areas further.

Brief Summary of the Guest Lecture on

<u>"Artificial Intelligence & Machine language Algorithms"</u>

Name of the Event Type (Workshop/Guest Lecturer, Webinar)	Guest Lecture
Organized By	MCA Department
Professional Society / Departmental Association	ТТА
Resource Person	Dr. G. Gopichand, Assoc. Professor, Department of CSE, Vellore Institute of Technology, Vellore
Title of the Event	"Artificial Intelligence & Machine language Algorithms"
Date	04-09-2023
Time	10.00 AM to 12.00 PM
Venue	409 A – MCA BLOCK
No. of Participants	64
Convener	Mrs. R. Padmaja
Coordinator of the Event	Mr. B. Vekateswarlu, Asst. Professor, MCA Department
Objective of the Event	To provide students with a comprehensive understanding of AI and machine learning concepts and their practical applications.

Topics Covered	 Introduce the fundamental concepts of artificial intelligence and machine learning. Explain various machine learning algorithms and their use cases. Demonstrate the implementation of AI and machine learning models. Provide insights into the latest advancements and trends in AI and machine learning. Encourage critical thinking and problem-solving using AI and machine learning techniques.
Outcome of the Event	 By the end of the guest lecture, students should be able to: Understand the basic principles of artificial intelligence and machine learning. Identify and describe different machine learning algorithms and their applications. Implement basic AI and machine learning models using relevant tools and programming languages. Analyze and interpret the results of AI and machine learning models. Apply AI and machine learning techniques to solve realworld problems. Stay informed about current trends and advancements in AI and machine learning.
